EDUCATION

Vellore Institute of Technology (VIT), Vellore, India — Expected July 2028
B.Tech in Computer Science, specialization in Cyber Security | **CGPA: 8.96 / 10**
Class XII — Govt. Higher Secondary School No. 2, Datia, M.P. — **May 2023**
Madhya Pradesh Board of Secondary Education (MPBSE) | 2023 | **Percentage: 84.6%**
Class X — Rani Laxmibai Public School, Datia, M.P. — **May 2021**
ICSE (CISCE) | 2021 — **Percentage: 87%**
Coursework: Data Structures & Algorithms, Web Development, OOP, DBMS, Operating Systems, Computer Networks

TECHNICAL SKILLS

Languages: C++, **Python**, JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks: React, Next.js, Node.js, Express.js, Material UI
Backend & Database: REST APIs, MongoDB, Google OAuth, Google Drive API, Nodemailer
Tools: Git, GitHub, Render, Microsoft Azure, Vite, VS Code, Chrome DevTools
Professional: Problem-solving, communication, team collaboration, adaptability

PROJECTS

Startup Street 11th Edition (SSXI) Event Platform | Next.js, MongoDB, Google Drive API, Azure | Live Site — Sep 2026

- Built participant/admin interfaces and backend features for a 24-hour ideathon, including event tracks, timelines and submission portal
- Implemented separate login flows: VIT-restricted Google OAuth for internal participants and Nodemailer email-OTP verification for external users; enabled team creation and joining through generated codes
- Integrated pitch-deck submissions (15 MB limit) with GitHub and optional prototype links, storing files in Google Drive with structured naming
- Deployed on Azure for the live event: **50 teams** registered, with 10–15 teams active at a time

StackVision — PDA Visualizer | React, Express.js, BFS | GitHub — Feb-Apr2026

- Contributed to a team-built Pushdown Automaton (PDA) visualizer for inspecting non-deterministic execution and stack behavior
- Worked on and debugged the BFS-based execution engine to explore PDA configurations, process stack transitions, and trace execution step by step

CampusConnect | React, Node.js, Express.js, MongoDB, CSS3 | GitHub — June 2026

- Built a full-stack student collaboration platform for discovering mentors, teammates, and project collaborators
- Developed responsive React interfaces and Express/MongoDB APIs for profiles, user search and filtering, connections, team-requirement posts, and application flows
- Added Google OAuth sign-in and Nodemailer-based email-OTP verification

Carbon Capture AI Pipeline (Prototype) | Python, Machine Learning | GitHub — Feb 2026 - Present

- Developed prototype logic for sensor-driven carbon-capture monitoring and optimization
- Implemented Isolation Forest anomaly detection and a Q-learning fan controller; designed validation of CO2 estimates and credit eligibility from gas-flow and CO2-concentration readings

EXPERIENCE

Technical Core Member, Center for Social Entrepreneurship and Development (CSED), VIT Vellore — Feb 2026 – Present

- Contributed to the website for Auction to Action (A2A) 3rd Edition (a2a.csedvit.com), which supported **100+ concurrent accounts**
- Coordinated with technical team to develop and deploy the SSXI ideathon platform for the CSED event (see Projects)
- Developing the official CSED website in React (in progress); participating in feature planning, code reviews, and Git/GitHub workflow

ACHIEVEMENTS

- **Winner, Logic Loops 2.0 – Yantra Central Hackathon** (VIT Vellore), Feb 2026, for carbon-capture monitoring and optimization prototype

CERTIFICATIONS

- Deloitte Australia Cyber Job Simulation (Forage), Oct 2025
  Credential ID: CjMvdBYvmjXpimzbu (Credential)
